

Office of the Assistant Secretary for Preparedness & Response

HOSPITAL PREPAREDNESS PROGRAM

NEW YORK

HPP FUNDING

13% decrease in funding since FY 2013

HIGHLIGHTS

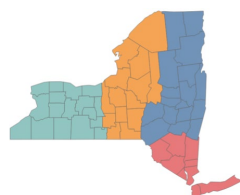

- New York (NY) uses HPP funding to build and maintain a strong emergency preparedness and response foundation for the state's 20.2 million residents.
- The NY State Department of Health (NYSDOH) developed all-hazards surge management and preparedness lessons learned through coalition workgroup coordination and partner activities.
- The NYSDOH trained 149 participants to more effectively communicate needs, request supplies, and manage logistics.

SPOTLIGHT ON PREPAREDNESS

On December 6, 2021, 67 Health Emergency Preparedness Coalition (HEPC) members participated in a live compassion fatigue training session, which featured an interactive chat session and self-assessments. The goal of the training session was to provide strategies for building personal and professional resilience and to assist members in identifying and recognizing symptoms of burnout, traumatic stress, compassion fatigue, and vicarious trauma. The training was recorded and shared with other regional HEPCs and added to a list of pre-approved trainings that coalitions across the state can take.

COVID-19 RESPONSE

- To reduce the impact of the COVID-19 response, NYSDOH shared information with local health departments and health care organizations.
- NYSDOH identified additional local, state, and regional partners in community leadership positions to engage in HEPC planning and activities. NYSDOH also engaged HEPC Clinical Advisors in reviewing and providing input on HEPC Emergency Operation Plans.
- Throughout the COVID-19 response, NYSDOH collected information regarding supply chain integrity through daily surveys as well as through direct outreach, such as that with health care associations.
